## Real Time Solution

**People Monitoring and Tracking  
to the lower cost in the market**

SmartTRACKER Person

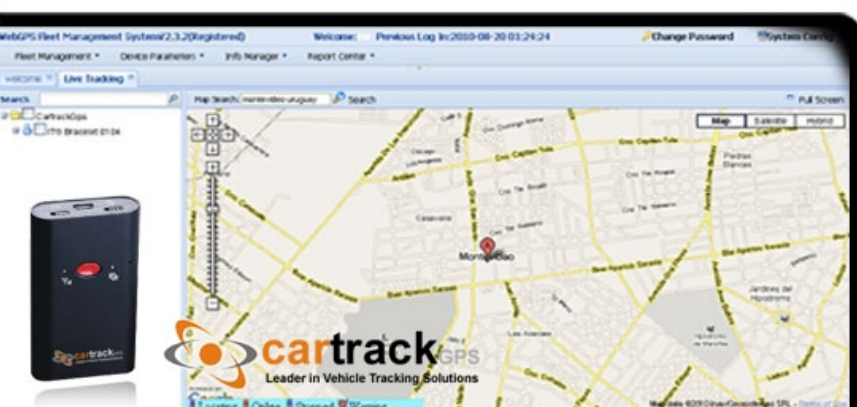

## FUNCTIONALITIES

- QuadBand Device 850/900/1800/1900. GPRS Class 2.
- Voice monitoring function.
- 9 Configured numbers for panic alert.
- Overspeed alert through SMS.
- Low battery charge alert.
- Geofence Configuration.
- Commands and location information received through SMS.
- Movement Sensor included for power saving.

## TECHNICAL DETAILS

- QuadBand GSM 850/900/1800/1900.
- GSM Module included GPRS/Class 12 TCP/IP.
- GPS/Sirf Star III/LT Module.
- 20 GPS Channels.
- Tracking Sensitivity: -159dBm.
- Acquisition Sensitivity: -144dBm.
- Locating time cost/Hot start: 2sec (open sky) Warm start: 15sec Cold start: 38sec (open sky).
- GSM Antenna included. High Sensitivity GPS 360 grades .
- LED Indicator / Three indicators leds: GPS (blue), GSM (green), Energía (red).
- Panic Button.
- Battery: 1050 mAh.
- Weight: 70g.
- Dimensions: 76.0 x 45.0 x 16.0.

## OUR PROFILE

We are a company pioneer in GPS system integration and software development for vehicle location worldwide. We have a wide tracking solution range, from 1996, year on which we started manufacturing national level (Uruguay), all kinds of GPS devices for tracking through AMPS and CDPD cellular technology, that was the ones that led the market in that time.

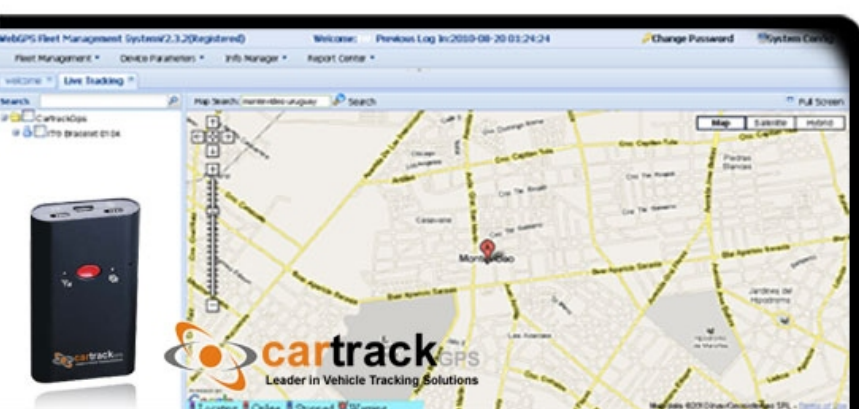

We export tracking solutions to 100 countries, and finally to get the costs lower, we manufacture our own equipments directly in Asia – to which we configure the firmware (the “brain”) totally designed in Uruguay.

This mean that the technology is created 100% by uruguayan technicians, meanwhile manufacturing is done with high qualities norms and more competitive prices - that is the advantage that has hiring the offshore components assembly, as well as to minimize errors and factory failure to 1 thousand rate.

We offer our high qualified and multidisciplinary staff, who are the ones that are in charge of sales and setting up – as we think that those who establish first contact with the client and advice as well, must deepen their relationship and responsibility to client always. This way lasting relationships are established, on which fast response to clients are guaranteed on matters to failure or incompatibility or to possible new accessories integration and adaptation, as well as to create a system according to clients need.

The fact of offering a turnkey solution makes us to improve our service, as we need always to overcome and continue marketing in order to continue within the market. We focus on the prodcut and we dont charge for technical support, this is why we think that we provide a perfectly profitable equation – which provide reliability and minimize monthly costs from our clients.

We are located in the central area from Montevideo, Uruguay, and our worldwide approach has been mainly through internet; until the current date we have sold over than 50.000 units, existing a huge demand in the last years, in regards of the GPS Solutions markets.
